

#### HIGH SUSPICIOUS ASPECTS

- Taller-than-wide shape
- Irregular or microlobulated margins
- Microcalcifications
- Marked hypoechogenicity

≥ 3 signs and/or adenopathy → TIRADS 5

1 or 2 signs and no adenopathy → TIRADS 4B

#### LOW SUSPICIOUS ASPECT

- None of the high suspicious aspect
- Moderately hypoechogenic

→ TIRADS 4A

#### PROBABLY BENIGN ASPECTS

- None of the high suspicious aspect
- Isoechogenic
- Hyperechogenic

→ TIRADS 3

#### BENIGN ASPECTS

- Simple cyst
- Spongiform nodule
- “White knight” aspect
- Isolated macrocalcification
- Typical subacute thyroiditis

→ TIRADS 2

Normal thyroid US

→ TIRADS 1
